WHITECROSS

Operational software tailored to you

Your efficiency toolkit

From content management to data analysis, our suite of operational tools gives you and your team everything you need to manage your customers effectively and efficiently.

Selector

Our advanced rules engine tool offers dynamic routing capabilities, allowing you to choose the most suitable order fulfilment options in real-time so that customer orders are delivered in the quickest possible timelines.

Ledger

As our scalable transaction management and processing solution, Ledger is designed to scale as you grow your business, so you always have a complete picture of your customers' transactional history.

Approvals

Streamline your fulfilment processes with Approvals, our customisable tool that provides the highest levels of oversight over your orders with configurable workflows from placement to completion.

Insights

With intuitive self-service reporting and data warehouse capabilities, Insights gives you valuable and actionable data into your business's performance with flexible reporting options tailored to your needs.

Workflow

Automate your team's routine tasks and streamline internal operations with Workflow, so you can concentrate on running your business.
